Exacting craftsmanship. Uncompromising attention to detail. Limitless inspiration for adventure.

There is no denying that Airstream is the world’s most iconic travel trailer for a reason. Durable, reliable, and built upon nearly 90 years of innovation, Airstream travel trailers helped write the American travel story. We’ve crisscrossed the globe, parked at the foot of the Pyramids, explored the National Parks, and camped for the weekend down the road.

Proudly built by hand in Jackson Center, Ohio, USA by hundreds of talented craftspeople, each Airstream travel trailer takes approximately 350 hours to build. Form and function are tightly woven into every thoughtfully-planned inch, and every design is carefully considered. The result is a travel trailer that will last a lifetime – or more.

While we manufacture every Airstream from the wheels up, we like to say that we don’t actually build travel trailers. Instead, we build someone’s retirement, their well-deserved vacation, or their retreat from a hectic day.

In other words: Airstream builds dreams come true.

Learn how Airstreams are built to last.
About Globetrotter

European inspired and American made, Globetrotter is a modern celebration of minimalist design. Its crisp, clean lines and delicate neutral colors make it a sophisticated beauty while softer curves, panoramic windows, wrap-around upholstery, recessed speakers, and backlighting throughout make it a modern traveler’s dream. From wine tastings to art festivals to cross country treks, the Globetrotter Travel Trailer will turn heads and hearts young and old.

1 Bathroom
The Globetrotter offers two bathroom options: A split bathroom with a shower along one side and a private toilet area with a sink across the hall, or a three-piece bathroom all behind one door.

2 Franke® Galley Faucet
Sleek Franke faucet brings the modern design and convenience you love at home along for the journey.
Space for Everything
Clutter stays out of sight with the slide-out pantries and closet that add plenty of storage.

Expansive Galley
Preparing meals will be a breeze in the Globetrotter’s spacious galley where you will find modern appliances and fixtures you would expect in a residential kitchen.

Under-bed Storage
Make your trip last longer in the Globetrotter with extra under-bed storage. There is ample room for that inevitable additional bag.

Convenient Charging
USB ports and 110V outlets are smartly located inside the Globetrotter, ensuring that whether you’re checking the local weather to plan the day or enjoying a book on a tablet, power is never far from reach.

Three-burner Gas Stove
The upscale, residential-style stove with glass top creates space for preparation of gourmet meals for friends and family.

Premium Appliances
A Baraldi cooking vent, a microwave, and a stainless steel sink with DuPont™ Corian® cover make cooking not just easy, but enjoyable.
CUSTOM CURVED CABINET DOORS

A major part of the Globetrotter Travel Trailer’s appeal is how seamless the storage feels. Upper storage cabinets throughout the travel trailer are finished with our custom curved wood doors, coated in a bright white that’s resistant to fingerprints. Inside are hydraulic hinges that keep the doors in place when they’re fully open and add a soft close when they shut.

LESS WORK. MORE FUN.

Simple set-up starts your trip out right and gets you going in the right direction – doing less work and focusing on fun. Spend less time setting up a campsite and more time enjoying it with standard power awning and power stabilizer jacks. Both extend and retract with the push of a button.
1. **HITCH™ Seating Upholstery**
   The Globetrotter is the only Airstream travel trailer to feature award-winning HITCH fabric for its seating upholstery. HITCH features a fine woven texture, subtle metallic tip print, and a distinctive two-tone feel. It’s also incredibly durable and stain-resistant.

2. **Ultra-modern Kitchen**
   The galley features a three-burner stove with a glass cover, a Baraldi vent, an oven, a refrigerator with a freezer, and a microwave.

3. **Modern Conveniences**
   The deep stainless steel Moen® sink complements the European modern Franke faucet.

4. **Ample Storage**
   A deep closet gives you plenty of space to hang outfits, while even more storage hides under the bed.

5. **Fusion Factory-tuned Stereo**
   Stream from your devices using Bluetooth® or listen to satellite or AM/FM radio. The sound system is built into the cabinets and projects throughout the travel trailer.

6. **Dinette**
   When positioned as a table and seating, the dinette has plenty of room for four people to comfortably eat and socialize. It can be converted to a lounge or sofa as well as a bed for additional seating options.

Airstream travel trailers aren’t built the fastest way. Not the easiest, either. That’s because they’re built with an obsessive attention to detail, and a willingness to choose the processes and material that make the absolute best product – even if it’s a little harder, takes a little longer, and costs a little more.

Every single Airstream travel trailer is carefully crafted by hand at our headquarters in Jackson Center, Ohio. And each one takes an average of 350 hours to complete – compared to about 50 hours for the typical RV. Why? Because we build our travel trailers to last not just a lifetime, but for generations to come. That’s why they easily outpace the average RV lifespan of 15 years, and why 75% of the Airstreams we’ve built since 1931 are still on the road today.

That’s the kind of quality that makes Airstreams last for generations, and the kind of quality product we’re proud to put our name on.
Rear-view Monitoring
A rear-view camera is mounted to the back of the travel trailer to make reversing and parking so much easier.

Pre-wired for Solar
Seamlessly add solar panels and monitor them inside the travel trailer.

Climate Control
Equipped with efficient, Quietstream™ AC system (second unit optional) with a heat pump and an electronic thermostat, plus a gas furnace and onboard water heater.

Dual Axle
Globetrotter has two axles, and is built for ease of towing.

Zip Dee® Awning with Sunbrella® Fabric
Upgraded pinstripe front power awning provides shaded outdoor space, and the Zip Dee® matching window awnings keep the interior cool and private.

Power Stabilizer Jacks
Powered leveling and stabilization make it faster, easier and simpler to get up and running at the campsite.

Exterior Low Pressure Gas Grill Connection
Our low pressure grill connection is made specifically for ease of use with compatible Airstream Weber® Grill.

Panoramic Windows
Front panoramic windows are protected by three rock guard pieces. Each is built to swing away from windows for easy cleaning.

Front Stone Guards
Stainless steel stone guards mounted on the front of the travel trailer protect the lower segments from road debris.
